RICHARD BARTON

Platform Architect | Azure Cloud Architecture | Technical Leadership

St. Louis, MO | Rick1stl+work@gmail.com | linkedin.com/in/rick1stl | rickb.org/resume

PROFESSIONAL SUMMARY

Platform Architect and hands-on Azure engineer with 15+ years of enterprise software experience, progressing from full stack development into software and cross-application platform architecture. Lead Azure infrastructure and architectural direction across multiple applications and teams; combine Infrastructure as Code, cloud operations, security, CI/CD, and performance engineering with developer mentorship and product strategy.

AZURE & TECHNICAL EXPERTISE

Azure: App Services, Azure Functions (Flex Consumption), Azure SQL, Front Door, Static Web Apps, Key Vault, Application Insights, Azure DevOps

Infrastructure as Code: Hands-on ARM templates, Azure Bicep, and Terraform for Azure provisioning, configuration, and repeatable deployments

Engineering: Node.js, TypeScript/JavaScript, Vue 3, Angular, Electron, .NET/C#, REST APIs, SQL Server, Git, PowerShell, automated testing, authentication and authorization

PROFESSIONAL EXPERIENCE

EASTMAN CHEMICAL COMPANY | St. Louis, MO | Mar 2020–Present

Platform Architect | Feb 2026–Present

- Provide Azure platform architecture and technical direction across multiple enterprise applications and engineering teams, expanding beyond a single-product scope.
- Design and maintain Azure infrastructure using App Services, Functions, Azure SQL, Front Door, Static Web Apps, and Key Vault, with attention to scalability, security, and reliability.
- Author and maintain Infrastructure as Code using ARM templates, Bicep, and Terraform specifically for Azure, enabling standardized provisioning and repeatable deployments.
- Guide Azure DevOps CI/CD practices, cloud configuration, monitoring, and deployment approaches across application teams.
- Partner with product and engineering stakeholders on platform strategy, technical priorities, architectural tradeoffs, and longer-term direction; mentor engineers and promote sound design practices.

Senior Software Architect | Mar 2022–Feb 2026

- Architected internal and customer-facing applications and REST APIs using Vue.js, Electron, Node.js, and TypeScript, translating product requirements into maintainable technical designs.
- Built and supported Azure App Services and Azure Functions workloads, including Flex Consumption scaling considerations and cloud application operations.
- Improved observability with Azure Application Insights, diagnostics, and Kusto queries to investigate production issues and application performance.
- Worked with high-volume Azure SQL workloads on query optimization, indexing, statistics, and database maintenance; troubleshot application performance across service and data layers.
- Designed Azure DevOps build/release workflows, integrated authentication with Auth0 and Microsoft Entra ID patterns, and supported application security and MFA considerations.
- Mentored junior and mid-level developers through code reviews, pairing, and architecture discussions; collaborated with product owners to influence roadmap decisions and technical investments.

Full Stack Web Developer | Mar 2020–Mar 2022

- Developed enterprise applications using Vue.js, Electron, Node.js, TypeScript, and API integrations; contributed to reusable UI components and application modernization.

HUNTER ENGINEERING COMPANY | Lead Angular Developer | Aug 2019–Mar 2020

- Led enterprise Angular development, API integration patterns, codebase improvements, and collaboration on Azure-hosted deployments.

INTERCARD | Senior Software Engineer | Nov 2018–Aug 2019

- Developed Angular/TypeScript applications and .NET Core/C# REST services; designed SQL and JWT authentication patterns with dependency injection and unit testing.

MARITZ GLOBAL EVENTS | App Developer | Apr 2015–Nov 2018

- Helped modernize a major internal application using AngularJS/TypeScript, Java/Spring REST services, and SQL.

FLEISHMANHILLARD | Web Developer | Dec 2011–Apr 2015

- Built analytics dashboards and SharePoint/.NET integrations; supported Azure client sites and enterprise infrastructure.

SEXTANT TECHNOLOGY PARTNERS | Network Engineer | Nov 2010–Dec 2011

- Automated deployments and upgrades; supported client networks, servers, and SharePoint installations.

STATEAMIND WATERSPORTS | Web Developer | Feb 2010–Nov 2010

- Redesigned and maintained PHP/MySQL website and inventory application.

EDUCATION

M.S., Information Systems — University of Missouri–St. Louis (2011) | B.A., Psychology — University of Missouri–St. Louis (2005)
